SitePal Update

Now you can automatically generate code to match your destination

SitePal Has Been Updated With A New Interface and Easier Publishing Capabilities

In our effort to continue to improve SitePal to better serve you, we have updated our product interface! You will note that the new design is easier to navigate, providing you quick access to editing and updating your SitePal speaking characters.

With the new update, now its easier than ever to publish SitePal speaking characters to any website of your choice. With a click of a button simply choose the location from the options offered and the specific code is automatically generated for you. All you have to do is copy and paste, its that easy!

SitePal Marketing Tip

Daughter Nature uses SitePal's Lead Generator solution to collect contact information for the company's newsletter.

Generating Leads For Your Customer Database

One problem most small business owners face is how to effectively acquire prospects. While having a website is a great way to reach your target audience, what happens when they land on your site, can be the difference between you gaining or losing a customer.

Collecting contact information (or leads) from your website visitors is an effective way to expand your customer base by cultivating a list of people to target.

SitePal's new Lead Generator solution allows you to easily place a speaking character on your website collecting important contact information from your visitors which is then effortlessly emailed to your inbox.
