SitePal in the News

SitePal in the News: Article from South China Morning Post

The New York-based company's SitePal application allows users to create custom avatars and change their appearance, clothes and background setting. Other features allow users to give a voice to their avatar through text-to-speech technology, uploaded MP3 files or phone recordings. Also, for a one-time fee, customers can submit a photo from which Oddcast artists will create a "photo realistic" or animated avatar.

Sauna Works Personalizes their Website with SitePal

Sauna Works uses SitePal to put a personal face on the company

Sauna Works is one of the largest U.S manufacturers of far infrared saunas, their 100% Cedar Clearlight Saunas are the highest quality far infrared saunas on the market. Implementing SitePal has put a personal face on the company and helps differentiate them from competitors. Using SitePal allows Sauna Works to drive home important points that a customer might miss when browsing the website. One important benefit from implementing SitePal was that the company noticed that their customers stayed longer on the site and visited more pages.

SitePal Tip : Animated backgrounds for your VHost

Interested in having an animated image behind your VHost?

Our [forum](#) is a great resource for SitePal users to find out about different ways to use your SitePal VHost.

One of our members in the SitePal Forums [responded with the following tip](#): "One thing you can do is to place the animated gif as the background of a table, then just embed the SitePal animation with no background selected and the color set to transparent."
